WORK EXPERIENCE

Software Developer (Intern)

MVP Studio

09/2019 – Present   *Sydney*

MVP Studio is an incubator for early-stage software businesses, assists entrepreneurs to create an early version, or Minimum Viable Product (MVP), of their intended software product through a proven development process

- Currently working on project Talent, a web and mobile application for connecting employers and recruiters with potential employees that are matched by required skills. Assigned tasks include building the job publishing and job managing interfaces on the employer side and the employee's profile page using **ReactJS** and **Redux** for the front end and **C#, .Net Core** and **EF Core** for building a **.Net API** and **Microservices** on the back end with **mongoDB** as database
- Daily scrum meetings with two-weekly sprints and code reviews on a regular basis

Web Developer (Intern)

Study-in-Bali

03/2019 – 08/2019   *Seminyak/Indonesia*

Study-in-Bali is a travel agency specialised in providing mid-term accommodation, activities, transport and rentals to foreign students on university exchange on Bali

- Building internal business management apps (inventory, scooter rental, accommodation CRM)
- HTML email design, Wordpress themes and plugin customisation for company blog website
- New company website redesign (to be launched), integration of booking forms, payment gateways (stripe and DOKU), local fast boat search engine development and scooter rental booking interface
